

New Asset Hub enhancements

September, 2015

Take advantage of the new Asset Hub enhancement:

- **Improved upload experience** – no need to pre-select the asset category at upload time anymore. Upload many different files at once and specify the asset category later, when you edit the metadata in the workspace.

- **Improved search experience** – you can use combined search to narrow your results for a faster and more efficient process. You can filter advance search/search and search by product at the same time.
